So vakeres?

THE WORLD DAY OF THE ROMANI LANGUAGE THE WORLD SYMPOSIUM ON ROMANI LANGUAGE

CONCLUSIONS | 2010-11-14

Following the conclusions about the Romani language, which originate from the 4th Congress of Roma (Warszawa, April, 1990) and the Charter 4 / 2000, which stems from recommendations made by the Council of Europe, and related to education of Roma in Europe, as well as the conclusions reached on the Regional meetings of »Sarajevo group" in Sarajevo, Belgrade and Murska Sobota, during the year 2010, we, the participants of the World Symposium on Romani language, reached the following conclusions:

I. Language policy of Roma

According to the fact that there are many problems in the development of the Romani language in many European countries, and that in certain countries, Romani language is still not recognized and has not yet begun the process of developing, we made the conclusion that it needed an effective lobby in the political institutions of the European Union (EU) and Council of Europe (CoE), the Roma educational fund (REF), UNESCO, UNICEF, the United Nations (UN) as well as lobbying in the process of the Decade of Roma Inclusion 2005-2015;

Extrémizmus

Rok 2009, hlavne pred voľbami do VÚC, bolo poznačené silným nárastom extrémizmu. Príčinou bola snaha politikou ponúknuť populistické riešenia a tým bodovať vo voľbách, zámkou boli niektoré kriminálne činy, ktoré sa udiali na východe. Cieľom dokumentu bolo zistiť, akým podielom sa na raste extrémizmu podieľajú samosprávy. Či efektívne pracujú s komunitami a kakým výsledkom a sakými financiami dokážu meniť životné podmienky Rómov. V dokumente porovnáваме dianie v Kropachoch a v Trebišove. Toto porovnanie jasne ukazuje, že výsledky sú tam, kde je ochota

as the International Romani Union (IRU), the European Roma Forum (ERTF), and the Roma organizations in their home countries as well as the governments of countries where the Roma live.

II. Mechanisms for the implementation of language policy of the Romani language

In the area of mechanisms that include the implementation of the Roma language, we ask countries to provide support in the education of Roma in Romani language in primary and secondary schools and at university level, which in itself should include national, regional and international levels.

Because Roma live in almost all European and world countries, we believe that we should make a network (on all these levels) of experts who work in the Romani language and linguistics.

The committee of experts should provide IT solutions (Information Technology) with which will be facilitated by electronic communications and the creation of materials that contain programs in Romani language.

III. Linguistic pluralism and normalization / standardization of the Romani language

Previous experience related to policy of Romani language and mechanisms of implementation of these policies, have shown the need for action and operative plans for the Romani language and its pluralism, which is a great treasure of the Romani cultural heritage. These processes are not suspended by standardization process that began in Romani language.

At this symposium the questions about dialects that are spoken in Spain, France, Britain and Finland are defined, as well as their speakers, when it comes to the process of restoring these Roma in Romani language, and their recognition of the Romani language.

IV. The World Day of Romani language to be declared as the International Day of the Romani language

samosprávy komunikovať a brat' Rómov ako partnerov v procese integrácie. Dokument je z cyklu Hazardné hry s chudobou.
